Art Unit: 1616

Claims 42-47,57,75 link(s) inventions I-VIII The restriction requirement among the linked inventions is **subject to** the nonallowance of the linking claim(s), claim 42-47,57,75. Upon the indication of allowability of the linking claim(s), the restriction requirement as to the linked inventions **shall** be withdrawn and any claim(s) depending from or otherwise requiring all the limitations of the allowable linking claim(s) will be rejoined and fully examined for patentability in accordance with 37 CFR 1.104 **Claims that require all the limitations of an allowable linking claim** will be entered as a matter of right if the amendment is presented prior to final rejection or allowance, whichever is earlier. Amendments submitted after final rejection are governed by 37 CFR 1.116; amendments submitted after allowance are governed by 37 CFR 1.312.

Applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, the allowable linking claim, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 58,59,76,77, drawn to an invention comprising a nitroguanidine and a chloronicotiny, classified in class 504, subclass 130.
- II. Claims 60,61,78,79, drawn to an invention comprising a nitroguanidine and pyrrol, classified in class 504, subclass 138.

Art Unit: 1616

- III. Claims 62,63,69-71,80,81,87,88, drawn to an invention comprising a nitroguanidine and a pyrazole, classified in class 504, subclass 139.
- IV. Claims 64,65,82,83, drawn to an invention comprising a nitroguanidine and a diacylhydrazine, classified in class 514, subclasses 140,149.
- V. Claims 66,67,84,85, drawn to an invention comprising a triazole, classified in class 504, subclass 139.
- VI. Claims 68,86, drawn to an invention comprising a nitoguanidine and a biological / fermentation product, classified in class 504, subclass 129.
- VII. Claims 71,72,89,90, drawn to an invention comprising an invention comprising a nitroguanidine and an organophosphate, classified in class 504, subclass 128.
- VIII. Claims 73,74,91,92, drawn to an invention comprising a nitroguadinine and a carbamate, classified in class 504, subclass 140,143.

Inventions I-VIII are directed to related for comprising nitroguanidine. The related inventions are distinct if the (1) the inventions as claimed are either not capable of use together or can have a materially different design, mode of operation, function, or effect; (2) the inventions do not overlap in scope, i.e., are mutually exclusive; and (3) the inventions as claimed are not obvious variants. See MPEP § 806.05(j). In the instant case, the inventions as claimed are different in design in the nitroguanidine with chemically distinct compounds. Furthermore, the inventions as claimed do not encompass overlapping subject matter and there is nothing of record to show them to be obvious variants.

The inventions are distinct, each from the other because of the following reasons:

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Attorney Dunlap on 1/4/06 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Art Unit: 1616

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Response to Applicants' Position

Examiner acknowledges Applicants' election of species comprising denotefuran and a biological / fermentation product. The election is maintained.

The 112, 1st paragraph rejection on record will be vacated in light of the restriction requirement set forth above.

Examiner acknowledges Applicant willingness to file a Terminal Disclaimer to overcome rejection with respect to USPN 6593273.

This office action sets forth a restriction requirement due to the large number of classes / families of compounds being combined with a nitroguanidine in the claims.
